January Financial Tip: Pay attention to your fees

Understanding the fee structure(s) and the amount you have been paying on a monthly or even annual basis in regards to fees associated with your financial services is extremely important. Account service fees, annual financial planning service fees, invest account management fees, you name it. If you haven't reviewed and audited your fees yet, I recommend that you sit down and make this a priority.

Chances are you will be surprised by how much you've been paying in fees every single year which can instead be used for things such as retirement fund contributions, padding your emergency fund, or even tucking away money for family vacations. You work hard for your money, don't pay unnecessary fees if you don't have to.

Upcoming Events

COHEAO 2021 Virtual Annual Conference
February 9 - 11
